This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

CATALOGUE

OF

Books in the Pedagogical Section

OF THE

UNIVERSITY LIBRARY.

BERKELEY:
PUBLISHED BY THE REGENTS OF THE UNIVERSITY.
1894.

Printed at the State Printing Office, Sacramento.

A. J. JOHNSTON, Superintendent.

PREFACE.

The pedagogical section of the University of California Library is only in its beginnings. A number of additions have been made since this list was completed. Many gaps will still be apparent, which it is the intention of the University authorities to fill as soon as possible. The need of a catalogue such as this, to put into the hands of students, has become so evident that it has been deemed best to prepare it at once without waiting to supply even the most obvious deficiencies.

The preparation of this catalogue was begun by Miss Inez L. Robinson, of the class of '93, in connection with the work of the undergraduate seminary in Pedagogy. The major part of the work has been done by Miss Katherine M. Wertz, fellow in Pedagogy for the year 1893–4.

In the classification of books, valuable suggestions have been received from Dr. Hall's Bibliography of Educational Literature, and the catalogue of the Pedagogical Library in the office of the Superintendent of Schools, Philadelphia. In some cases the classification has been adjusted to the convenience of classes in the University, and in some other cases to the general plan of the Library.

This catalogue includes only those books that are to be found in alcoves LL and MM of the Library. There are many works in other alcoves that have a more or less direct bearing on important educational questions. A catalogue of such works as these may be attempted at another time.
